### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 10-33 were canceled due to an election without traverse on 6/24/2004.

### EXAMINER'S COMMENT

2. The Notice of Allowance is responsive to *BPAI Decision 9/26/2008*. The *remarks*, pages 1-6, filed therein has overcome the rejection of claims 34-36 and 42 **under 35 USC 103 (a) mailed on 1/25/2007**. Therefore, the rejections of claims have been withdrawn.
3. The following is a statement of reasons for the indication of allowable subject matter:

The claims in the instant application have not been rejected using prior art because no references, or reasonable combination thereof, could be found which disclose or suggest a stent assembly including *a plurality of bands circumferentially wrapped around the stent*, the plurality of bands include a first band, a second band, where the width of each of the bands are substantially less than the diameter of the stent, where the bands further comprise a polymer containing a therapeutic agent, where *the bands elastically grip the stent*, wherein *individual bands of the plurality of bands contain different therapeutic agents or the plurality of bands are made of different polymers, where the first band contains a first therapeutic agent and the second band contains a second therapeutic agent, where the first therapeutic agent is different than the second therapeutic agent*, in combination with the rest of the claimed limitations as set

forth in claims 34 and 35. As to claims 36 and 42, the prior art does not teach the invention including all the limitation as recited in claim 35, in combination with at least one band circumferentially wrapped around a stent, wherein the band further comprises a polymer containing a therapeutic agent, the band elastically grips the stent, the polymer comprises a first polymer, and a second polymer, where the first polymer is different than the second polymer, where the band further comprises a first layer and a second layer, the first layer located circumferentially around the stent, the second layer attached circumferentially around the first layer, the first layer being made of the first polymer and the second layer being made of the second polymer.
